MorehouseCowles Relocates to Chino, California Facility

Chino, CA August 18, 2005 – MorehouseCowles—a single source provider of technology and equipment for material production, purification and dispersement processes—recently relocated its business and production facilities from Fullerton, California to Chino, California. MorehouseCowles had occupied the Fullerton facility since 1967.

MorehouseCowles’s new 72,000 square foot facility, located at 13930 Magnolia Avenue in Chino, has been retrofitted to meet the company’s manufacturing and office space needs. “Much of MorehouseCowles’s long business history took place in the Fullerton facility, but we are excited to move to a more modern manufacturing complex,” said Mark Rosenbrook, Operations Manager of MorehouseCowles.

For more information regarding the MorehouseCowles facility move, please contact sales representatives at 800-625-4819 or visit www.morehousecowles.com.
